

# SPOT ON CNC

Professional Machining Service  
leave the manufacturing to our experts

 [www.spotoncnc.com](http://www.spotoncnc.com)

## Vision & Mission

To be the most trusted partner to manufacturers world-wide in providing high precision machined and fabricated components with outstanding customer experience.

Our mission is to supply manufacturers with exceptional subcontracting OEM parts and solutions using cutting-edge technologies and expertise of our employees with a goal to satisfy every customer with superior quality and speed.

*“Better parts for Brighter future”*

## Company History

**Spot On CNC** was first established as Sun Rise Property Co.,Ltd. Since 2004 we had been manufacturer of die and mold standard parts OIL FREE™ and other custom parts for the Sun Rise group of companies. The company served mainly the customers in automotive industries.

With our increasing capacities and experienced team in manufacturing custom parts. We had found the need for quality custom OEM parts increasing. In 2020 **Spot On CNC** was founded as another arm to focus on fulfilling the need of quality custom parts for our customers.

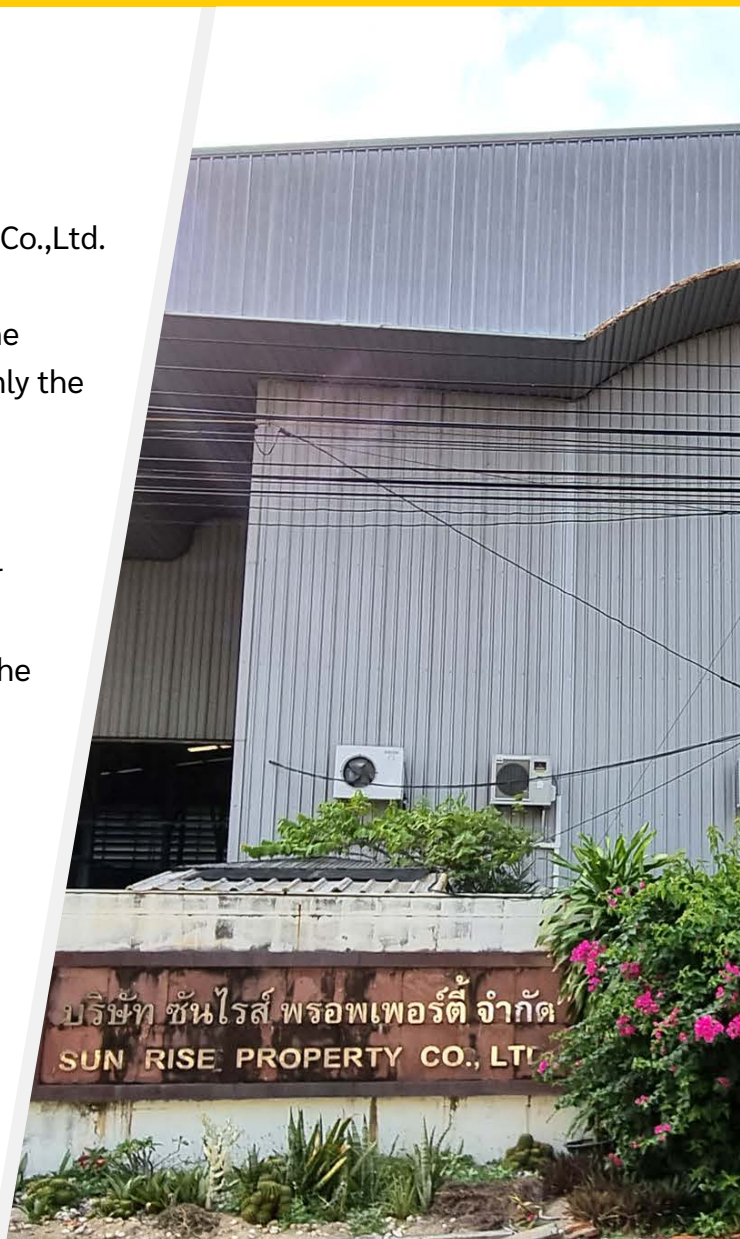

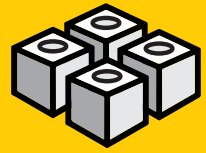

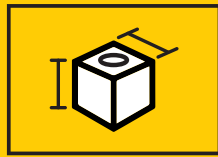

Established : 2004

M.D. : Mr. Surachai Roungrojkanranan

Capital : 16 Million Baht

Land : 4200 sq.m

## Design for Manufacturing

Whether you have a complete design or a rough design with incomplete details. We can help with design and engineering of your parts with our 3D modelling capability in order to achieve design-for-manufacturing and your requirements. This does not only help the parts to become possible to manufacture: most of the time it helps reduce the cost of manufacturing in the long term.

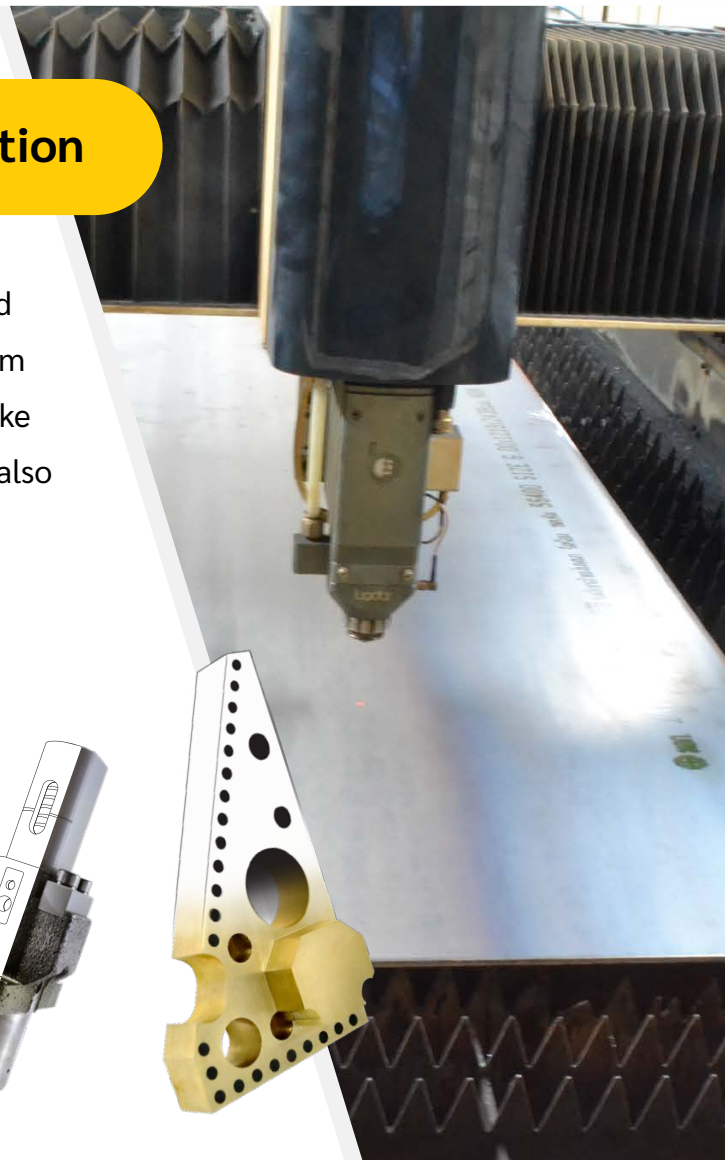

**Solid Edge.**  
Design better.  
**SIEMENS**

## Prototyping Production

When the product is at prototyping stage, you may need just a few parts for testing. You may also need input from a manufacturer to help you with the design. We can make the prototype in limited quantity to test. Meanwhile, it also provides us opportunity to learn and prepare for full on manufacturing stage.

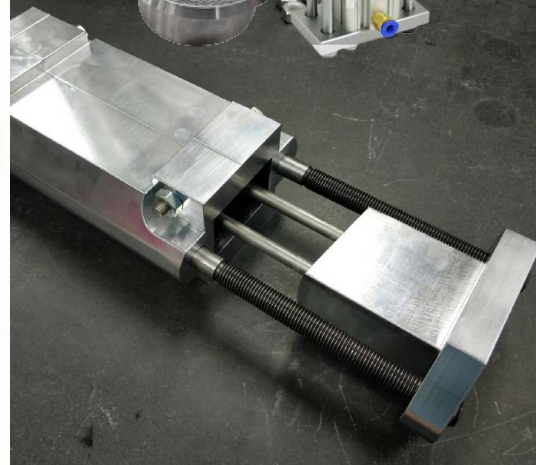

## Subcontracting OEM

We provide a full range of services of engineering, CNC machining, precision grinding, lathe turning machine, laser cutting, welding and assembly. Using cutting edge technology, we provide our customers with high quality parts and services. Our goal is on producing the end product as finished product which customers can use them right away without rejection or reworking.

We are experienced in producing for wide range of industries such as automotive, heavy machines, precision metal parts, energy, and even hobbyists.

At Spot On CNC we are on a quest to continuous improving our production technology. To make improvement in our quality and competitiveness. We had invested in cutting edge CNC machines, manufacturing softwares such as CAM and MRP.

## Quality Control

One of our main focus is on the quality control of all the works. All of the works we done are to be measured using appropriate tools. Thus our instruments are always well maintained and calibrated.

## Safe & Clean Factory

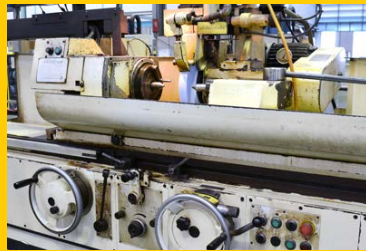

Our factory are well kept clean and maintained at all time. Safety and clean work enviroment is promoted and expected from our workers. We believe an orderly, healthy, and clean work place will translate into quality work results.

## Machine List

Machining Center

Cylindrical Grinder

Centerless Grinder

Horizontal CNC Lathe

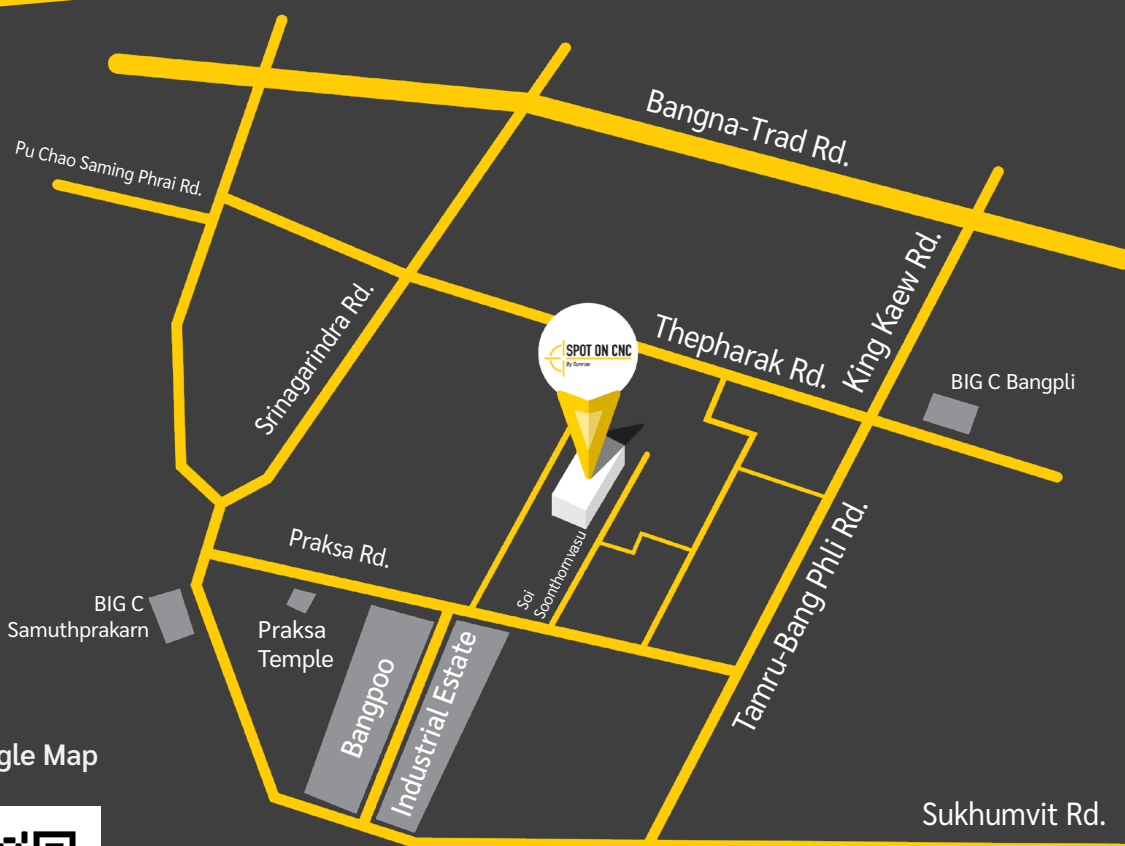

Internal Grinder

Laser Cutting Machine
